## CHAOTIC EUROPEAN SITUATION STABILIZES!!!

As the war moved into the spring of 1902, patterns of alliances begin to develop. The Great Powers are beginning to settle in to their natural alliances and interests. For awhile it seemed as if the situation would become chaotic, and in fact some of the opening moves seemed absolutely preposterous. But as Gamesmogul, we are glad to see that all the Powers are adopting an intelligent course of realistic expansion.

As the Saturday Evening Post embodied all the sentiments of brutal capital ism, economic exploitation, cultural trivia, fantasies of the American Dream that never were, and in short all those sentiments that assured me a happy and secure childhood, which sentiments I can now safely despise having become a mature adult, We will refuse all monies whatsoever bearing the image and likeness of Benjamin Franklin. Any person attempting to pay debts to us with such monies will have it summarily returned unspent and their debt cancelled!! So there!!
