DIPLOMANIA Supplement ---- NFFF Games Bureau Diplomacy Division ---- Issue No. 8
Editor and Publisher: Don Miller - - - - - 10 June 1970
The Journal of HYPERECONOMIC DIPLOMACY (Postal Dippy Game DMK) --- This is WAR!!!

A few important points --

1. It should be obvious that the \$1 game-fee doesn't even begin to cover our expenses. At the time we established the fee-scale, we never dreamed that the game would become so complex, and demand so much space in print. So now we are faced with two choices: (1) Drop the game; or, (2) Adjust the economics so the game is not such a financial drain on the GM. ##### After much consideration, we chose course #2. So, effective with issue #10 of AUX ARMES!, the magazine will be available only by subscription -- 5 issues for \$1.00 to DMK players, 4 issues for \$1.00 to others. ##### Now, on joining the game, some of you paid fees of \$3, some \$2, and most of you only \$1. Those persons who paid \$3 will be credited with a sub thru issue #19; those of you who paid \$2 will be credited with a sub thru #14; and the rest of you (regardless of at what point you joined the game) will be asked to send us \$1 to carry you forward from issue #9. (But don't worry; we ask all the \$1-players to renew effective with issue #10 to simplify bookkeeping; but all of you will receive at least 5 issues of AUX ARMES! for your initial \$1.00. Thus, if you received only issues 7-9, e.g., for your initial \$1, upon payment of another \$1 you would be credited with 5 / 2, or 7 issues, so your sub would not expire until issue #16. Clear?) ##### But note that you do not have to subscribe to AUX ARMES! to remain in the game. If you have a friend who takes A.A.!, or can find out the results in some other way, that's o.k. with us. The main point is that AUX ARMES! is an awful financial drag upon us, and we must find some way to lighten this load, or no more game. ##### And, we might add, that putting AUX ARMES! on a straight subscription-basis gives us greater flexibility -- this way, we can sometimes (like this turn) afford to put out two issues between moves instead of the customary one.

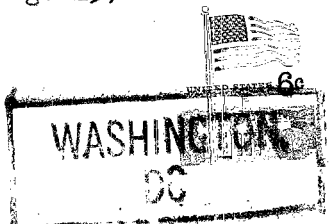

2. Speaking of two issues, do not send S'01 moves to us when you receive this issue. Instead, look this issue over very carefully, and write us immediately about any errors you find in the moves, any questions or comments you may have, etc. We plan to put out issue #9 approx. four to six weeks after publication of this issue, in order to pick up the rest of the Official Declarations, the propaganda, answer questions re the rules, put forth some new rules (piracy, expanded sea-power, colonization, payments to National Banks, etc.), notify everyone of errors found in this issue, publish new Roster (we won't have all the CoA's until end of June), etc.

3. We have a new Secretary-General: Jeff Wolfe, 4514 Granger St., San Diego, Cal., 92107. Jeff is still settling in, so we don't know whether he plans to publish THE W.O.R.L.D. RECORD or disseminate W.O.R.L.D. news thru AUX ARMES! We'll pass this news on to you in AUX ARMES! #9 (hopefully, along with a list of registered treaties, to bring us up to date in this area).

DMK (Hypereconomic Diplomacy) -- GERMANY BLITZES FRANCE! TURKEY ALMOST OVERRUN BY RUSSIA! SEVERAL GOVERNMENTS TOPPLED! ITALY CEDES MOST OF ITS TERRITORY, HOLES UP ON ISLANDS!

I. The WINTER, 1901 orders and results (underlined orders fail) --

IAW Rule #48, GM threw a pair of dice and came up with a five -- all Ag yields normal.

ABYSSINIA (Andrew Phillips) --
 Owner transferred to NORWAY.
 ABYSSINIA is out of game unless picked up later by new Off-Board player.

ALBION (Ken Porter) --
 Puppet State newly formed from 1/4 of Kent and 1/4 of Wales. Note that although U.K. orders stated ALBION was to have no income, this is not in accord with precedents set already. Our ruling on this is as follows: Any single province on the board at the start of the game may be partitioned once during the game, and no more. Partition of a single province must be considered to half the yield of that province, with 1/2 of original yield going to each piece (any remainder to be transferred as ordered by person writing partition orders). In the case of ALBION, since a single province was created by pieces from two provinces, we have modified this to allow, in such a case, 1/4-splitting of each of the two provinces involved, so the yield will be 1/4 from Wales and 1/4 from Kent. 1/4 is the minimum which may be transferred, and this only when a single province is being created from two or more provinces.

Yields assigned to ALBION are: 1 Ag, 1 I from Kent, 1 Ag, 2 I from Wales.

FRANCE (Continued) --

Costs: w/drawals	29 1/2	-	3	3
captured L	-	1	-	-
demob/dismantle	-	6	-	-
Adjustment	-	-12	-	-
O.H. end of WOL	-	-	-	-

(a) A second look at special rule #4 in AA1:#7 revealed some problems. We have therefore revised the rule so that a nation may not go under zero Ag or I balance during execution of orders except as the result of: (1) Defensive battle action; (2) Actions of foreign aggressors; and (3) moves within own borders or territorial waters. However, must have positive balance at end of season. (b) No yield from Burg. Also, I Sabotage in Gasc reduced I-yield by 1 factor, and I-Sabotage in Pica reduced I-yield by 3 I's. (c) Also has 5 M's available in Alge.

FRENCH TERRITORIES (Ed Buchman) --
 No orders rec'd. Note that Piedmont was gained WOL via ITALIAN cessation, with its (now unmanned) arsenal.

STOCKPILE:

O.H. start WOL	6	14	16	-
Costs: Deterioration	-	-	4	-

UK/UR: Clyd (8).

A few important points (continued from Page One) --

4. Remember (ref. THE W.O.R.L.D. RECORD #2) the makeup of the various W.O.R.L.D. bodies:

ECONOMIC & SOCIAL COUNCIL: GER, NRWY, RUS;

TRUSTEESHIP COUNCIL: SWIT, GER;

INTERNATIONAL COURT OF JUSTICE: MONT, GM.

Now, you elected officials have a very important role to play in this game, as do the Secretary-General and the GM. Unless you play these roles, the game will suffer, as indeed it is suffering now. The E&S Council, in particular, should be hard at work setting up a World Bank, providing a system of interest/payoffs to National Banks which deposit their funds in the World Bank so that they, in turn, may pay dividends/interest to their individual-nation depositors, etc. And the Trusteeship Council is supposed to see that countries the leadership of which has been abandoned don't go unplayed for very long. ##### If you people (the players of the countries named above) are able and willing to fulfill the functions of your office, write the S-G (address on Page One) immediately and let him know. And any other player in the game who would be willing and able to perform any duties requested by the S-G is requested to write to the S-G and offer your services. The W.O.R.L.D. is a fundamental part of this game; without it, the game becomes somewhat of a sham.... ##### And if you have applied for W.O.R.L.D. membership but have not yet made it -- or are a new nation which has not yet applied -- do so now -- give the S-G something to work with so he can get started. ##### Also, if you have sent a treaty to the former S-G for registration, please send a copy of it (or at least tell him about it) to the new S-G so he may establish the required registry of treaties.

5. We desperately need someone out there to sit down and restructure and re-write the rules for this game, taking into consideration not only all the changes which have occurred since the original publication of the basic rules back in DIPLOMANIA 19/20, but also all the "precedent-rulings" which have been published in the pages of AUX ARMES! since then. Structuring of the rules involves blocking the rules according to content (e.g., putting all the "investment" rules in one block, all the "type of order" rules in another block, etc.) ##### This is made particularly urgent by the fact that, although we have plenty of extracted basic rule-sets on hand, we are completely out of Change #1, and almost (if not completely) out of most of the subsequent sets of changes. This is why, if you are a new player, you may not yet have received a complete set of rules/changes. (We'll have a complete list of DMK issues in AA! #9 for you to check over and see what you're missing.)

6. All \$, Ag, and I which is shown as "Invested" as of the end of W'Ol is turned over to the W.O.R.L.D. for deposit in the W.O.R.L.D. Bank. Players may still withdraw invested factors, but no more interest/dividends will be paid until the E&S Council establishes the World Bank and sets up the procedures governing it.

7. A new map of TURKEY/PERSIA and surrounding area, reflecting changes made in W'Ol, will appear in AA! #9 -- also a breakdown of each nation, the provinces therein, and the payoffs/yields from each will be given. Is there anything else you'd like to see us cover in AA!#9? If so, pls. let us know immediately, or sooner....

II. WINTER, 1901 Official Declarations, etc. --

ARGENTINA, ECUADOR, PARAGUAY, PERU (only signatories so far of the following pact):

PAX AMERICANUS OMNI --

Be it hereby known that We, the undersigned free and independent nations of the American continents, having met during the Winter of 1901 in the city of Havana, Cuba, have drawn up and agreed to the following:

ARTICLE I: That the American continents, by the free and independent condition which they have assumed and maintained, are henceforth not to be considered as subjects for future colonization by any European power.

ARTICLE II: That with the existing colonies or dependencies of any European power we shall not interfere.

ARTICLE III: That we shall consider any attempt by any European power to extend their system to any portion of this hemisphere as dangerous to our mutual peace and safety.

ARTICLE IV: That when our rights are invaded or seriously menaced, we shall resent injuries and begin to make preparations for our mutual defense.

ARTICLE V: That We could not view any interposition with the members of the League for any purpose of oppressing them, or controlling in any manner their destiny, by any European power in any other light than as the manifestation of an unfriendly disposition toward all the members of the League.

ARTICLE VI: That in order to provide for the common defense, We do hereby join together in the formation of this "Occidental League of Defense" and pledge combined military action against any transgressor of the principles We have herein set forth.

RATIFICATION: Argentine Republic, Bolivia, Brazil, Canada, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Haiti, Honduras, Mexico, Nicaragua, Paraguay, Peru, United States of America, Uruguay, Venezuela.

BOSNIA -- The state of Bosnia hereby transfers control of all its holding (except Gold factors and income) to the new nation of Balkania. It ratifies the following Constitution of Balkania:

CONSTITUTION OF BALKANIA --

I. Membership.

1. Membership will initially be open to the six Balkan states of Servia, Bosnia, Greece, Montenegro, Rumania, and Bulgaria.
2. These states will become members immediately upon writing to the GM of their wish to join, and by ordering a transfer of sovereignty of the province and all its possessions (except gold factors) to the new nation.

II. Governor.

1. Each individual province of the nation shall have a governor who shall represent that province in the National Council and shall control the gold factors of that province.
2. A province may be without a governor, if the governor of that province chooses to drop out of the game. The governor of that province may also choose to turn over his office to some other governor of another province. He may not turn his office over to any person other than a governor.
3. If a province is governorless, it is no longer represented on the National Council. Control of all its possessions and factors other than gold factors shall remain in the hands of the seasonal president. The gold factors of that province shall be distributed by the departing governor of that province. In the event he leaves no orders, the gold factors shall be evenly divided between the remaining governors.

III. National Council.

1. Each provincial governor shall be a member of the National Council.
2. The National Council shall have the following powers:

- a. To elect a president each season.
 - b. Vote on amendments.
 - c. Vote on Alliances, Joint Commands, extended trade agreements, or treaties.
 - d. Vote on admission of new states.
 - e. Vote on succession of a province.
 - f. Vote on proposals brought up by a governor.
 - g. Vote on transferrals of M's.
3. A provincial governor may proxy his total vote on the National Council to another governor. This proxy shall be good for a maximum of 8 turns, its length to be set when it is written.
 - a. A proxy may not be taken back once given.
 - b. A proxy is not official until the GM receives it from the governor giving the proxy.

IV. Election of the President.

1. A presidential election shall be held once every season. Any governor of a province is eligible to vote and/or serve as president. Only a governor may vote and/or serve as president.
2. The voting for the president of a season shall take place the previous season. All votes must be received by the deadline for moves of the previous season.
3. All votes must be sent to the GM, who will publish each province's vote and the name of the winner. In the event of a two- or more-way tie, the GM shall cast lots to determine the winner.
4. When voting for a seasonal president or on any question, a governor may choose to abstain. He should notify the GM of his abstention.
5. In the event that a governor does not vote or abstain on any issue or election for three consecutive turns, it will be assumed that he has dropped out of the game, leaving his province unrepresented and his gold to be split between the remaining governors.

V. Control of non-Gold Factors.

1. Control of I, Ag, M factors and income; all military units, arsenals, and yards; R, Tr, and Mf factors shall be by the seasonal president for that season. He will send in the nation's orders for that season by the date set by GM.
2. It is expected that each turn each provincial governor will proxy a limited number of gold factors to the president, to be used for maintenance of the country.

VI. Control of Gold Factors.

1. Control of gold factors of each province shall be in the hands of the governor of that province.
2. A governor can do anything with his gold factors except that he can not spend them on sabotage or guerilla warfare directed at any province of this country.
3. A governor may issue a proxy to the seasonal president or any other governor for a specified number of stockpiled gold factors. Any gold factors not utilized will stay in the original province's stockpile. A proxy must and may be specified for a certain length of time, with a maximum length of 8 turns.
4. A proxy may not be written for invested gold factors.
5. A proxy should be sent to the player receiving the proxy and the GM. The GM shall publish this proxy.
6. In the event a governor drops out of the game still holding invested gold factors, these gold factors shall be withdrawn the following Winter turn and evenly distributed between the remaining governors.

VII. Miscellaneous Gold Rules.

1. Each governor shall send in orders each turn for the gold of his province. The GM shall publish all gold orders and the final gold balance in the move orders and results.
2. Transfer of gold between provincial governors shall be considered internal trade and shall not be charged any trade costs by the GM.
3. In the event that a province holding stockpiled gold factors is conquered, $\frac{1}{2}$ the stockpiled factors shall go to the conqueror, the other half remaining with the defeated governor. The governor must set up a governorship-in-exile to

control his remaining stockpiled and invested gold factors. He must set it up in another unconquered province of the nation. If there is no other unconquered province, then he may exile to a country of his choice.

VIII. W.O.R.L.D. Membership.

1. All states which join the new nation as provinces shall forfeit their W.O.R.L.D. membership.
2. The new country shall seek W.O.R.L.D. membership as soon as possible.
3. The seasonal president shall represent and vote for the nation in W.O.R.L.D. for that season.

IX. Other Foreign Policy.

1. The president shall have the power to make one or two-season trade agreements. He will have to obtain a 51% approval vote from the National Council to extend the agreement beyond 2 turns.
2. The nation may not enter into an Alliance or Joint Command without prior 60% approval of the National Council.

X. Admission of non-Charter States.

1. Other provinces and/or states than the six Balkans (i.e., Bos, Ser, Mont, Gre, Rum, Bul) may become provinces of the nation. They may do this by terms set down by the National Council and approval with an 80% margin by the National Council.

XI. Secession.

1. A province may leave the nation upon receiving 100% approval of the National Council.
2. Upon this approval the president will write a transferral-of-sovereignty order, along with a release of M's and other factors as are agreed upon.
3. The president may not write a transferral-of-sovereignty order without 100% approval.

XII. Money.

1. Because of the extra work that has been put on the GM by this constitution, each new province (Charter or non-Charter) shall pay an entry fee of \$1.00 to the GM. A player will not be allowed to vote in the National Council until his dollar is paid.

XIII. M Factors.

1. Upon admission a province's M's are joined in with the common national M pool. Thus, if that province is conquered, all M's in it retreat to a friendly province.
2. The president can not sell or rent M factors to another country without 80% approval of the National Council.

XIV. Research Factors.

1. The nation may purchase in one turn a maximum of one Ag research and one I research factors. These can only be purchased by the president.

XV. Amendments to the Constitution.

1. Amendments to the Constitution may be proposed by any governor.
2. An amendment will need a 67% yes vote by the National Council to pass.
3. Voting on amendments takes place the season after their proposal, at the same time and in the same way as the presidential election.
4. To make a proposal, the proposal must be sent to the GM for publication one turn before it is to be voted on.
5. The results of each vote shall be published by the GM in the same way as results of the presidential vote.

XVI. Treaties.

1. All treaties made by charter states will be honored by Balkania.
2. All treaties made by Balkania will need 70% approval of the National Council.

Ratified to date by BOSNIA and RUMANIA.

Also received by GM was a "Technical Assistance Agreement" between A-H and BOSNIA, to be effective when each participant in the agreement had signed and returned his copy of the pact. To date, signed copy received from BOSNIA, but not from A-H. So Agreement is, as of now, invalid and will not be published.

BULGARIA -- Bulgaria welcomes the new government of Serbia to the common prosperity sphere of the Balkans. We invite you to consider joining the Balkan League for International Security Services (BLISS).

DANMARK -- We hereby renounce the trade treaty with Germany as it no longer is economically sound to continue in small-scale trade.

GERMANY --- Achtung -- Announcement:
Over the past year it has become increasingly obvious that it is impossible for Germany to live in peaceful coexistence with her insidious neighbor France. The French actions over this period of time have shown their complete disregard for the sovereignty and well-being of her fellow nations, as well as a disregard for their economic and military strength. These actions are characterized by the mobilization of an army corps on the previously unarmed Franco-German border, and crash fleet-building program on the French north coast with the obvious intent of invading the United Kingdom -- one of Germany's closest allies. Since the French rejection of the German attempts at reconciliation and bilateral demobilization, we have decided that there is only one course of action left to us -- war. The mailed fist of Deutschland will have smashed Paris by Easter -- there will be no reconciliation. We are resolved to eradicate this menace to us and our allies from the face of the Earth.

GREECE -- To all nations and the W.O.R.L.D. Assembly:
Greece requests all nations to aid Greece in establishing Balkania. A nation dedicated to peace and harmony, we have now the opportunity to strike a blow for this dream. Turkish chaos gives opportunity to place Salonike, Candia, and Constantinople (West Adrianople) under Greek rule, thereby uniting all Greeks -- Albania to be set free, of course. Serbia and Bulgaria are racked by civil disorder. Assign these nations to Greece and the foundation of United Balkania is set. We ask this of nations and ask their approval in W.O.R.L.D. --I. Papajohnsonoupulous (PM).

Athens -- The King of all Hellenes denounces the moves of Austria into Italy and Russia into Turkey. While holding no love for Italy and Turkey -- indeed, Greece has favorably looked on Russia and Austria -- we cannot condone violence and conquest as a means of settling problems. Greece thereby offers a home for a Turkish government, with a little rental charge.

MEDITERRANIA -- Mediterrania demands full reparations from France for the theft of the Rosetta Stone, the nasal damage done to the Sphinx, and the abandonment of thousands of unwed Egyptian mothers. Such reparations should not fall below 30 gold units.

MEXICO --- Documents:

Ciudad de México
30 Octubre 1900

/Translation:/ My fellow citizens: Due to incessant Indian revolts and other disorders, the writ of the central Government no longer extends to the various states, nor even throughout the capital itself. The Republic is no more; I am President of nothing but a cluster of public buildings. As my last official act as President, therefore, I declare the Republic of Mexico to be dissolved. Let him rule who may.

/s/Diaz

/Note: MS found on 2 November 1901 in the personal effects of the late Porfirio Díaz, last President of the Republic of Mexico.

IMPERIAL PROCLAMATION -- Tenochtitlán -- 3 Noviembre 1900.

/Translation:/ Our dearly beloved subjects: Nearly four centuries ago, our forefathers were set upon by heathen barbarians from out of the mysterious East. For generations we have served under the yoke of the conqueror and bowed down to his pagan idols. Now we are free! The Aztecs, and their brothers the Toltecs, and the other tribes have regained their ancient homeland.

We therefore proclaim that the Republic of México is no more and that it is replaced by the Aztec Empire of Mexico;

That We, Moctezuma III, are Emperor and Autocrat of the Aztec Empire by the grace of the gods, the will of the tribes, and the vote of the chiefs;

That the pagan christians and other heretics are banned from Our realm, and that only the pure and true worship of the gods of the Aztecs and the Toltecs shall be permitted;

That all property of pagan and proscribed faiths is hereby confiscated and made a part of the Imperial household;

That the Empire shall observe and subscribe to all agreements made by the Republic of Mexico with other Powers at any time on or after 1 January 1900, without change or reservation;

That the Empire absolutely repudiates and rejects any agreements, treaties, pacts, or similar undertakings made by the Republic of Mexico with other Powers at any time prior to 1 January 1900.

/s/ MOCTEZUMA III
Emperor and Autocrat
of the Aztecs and
of all Mexico

TENOCHTITLÁN: His Imperial Majesty, Moctezuma III, declared His deep and heartfelt friendship for His friends and allies the King of Spain and the President of Argentina. In case you guys would ever like to come to Tenochtitlán for a real blow-out, just remember that we Aztecs really know how to put on the dog.

TENOCHTITLÁN (The Foreign Ministry): All nations having relations with the Empire are advised that the correct form of address of His Imperial Majesty is: Moctezuma III, Emperor of the Aztecs, Autocrat of All Mexico, King of Kings, Lord of Hosts, Heir of Quetzocoatl, Defender of the Faith, Lord Protector of Yucatán and the Lands of the Maya.

TENOCHTITLÁN (The Imperial Palace): The Government of the Empire of the Aztecs vehemently protests the establishment of a theocratic domain by the forcible and illegal seizure of Italian territory. This reprehensible attempt by the Popes to reestablish their mediaeval secular domain must surely meet the resistance of every peace-loving and civilized nation. Since we Aztecs are no mean hands at predicting the future ourselves, we might point out that this so-called concordat was signed by a thoroughly nasty Italian despot whose name appears to be Musso the Thin. Shall we ratify the works of this greedy and lustful dictator? Never! The Imperial delegate at the W.O.R.L.D. will vote against the admission of this political travesty and the Aztec Empire urges all other member states to do likewise.

TENOCHTITLÁN (The Foreign Ministry): The Aztec Empire intends to vote against any applicant for W.O.R.L.D. membership which has not shown intent to participate in the activities of the world by submitting orders or official documents. We urge all other member states to apply the same criterion, that lack of activity means lack of interest and therefore a "no" vote for membership.

TENOCHTITLÁN (Imperial Chancery) (3 January 1901):

KNOW ALL MEN BY THESE PRESENTS:

The bearer of this document is His Excellency Stewed-Dog Mouldy-Gourd, Ambassador Plenipotentiary of the Aztec Empire of Mexico, beloved of the Emperor, and pure-hearted spokesman for His Imperial Majesty in the court of the King George in the distant Land of Ton-Ga.

Know further that this instrument constitutes His Imperial Majesty's most gracious recognition of the ~~existence~~ independence of the same Ton-Ga, in revolt from the wicked and pernicious enslavement of the pagan English. A copy of this document shall be placed in the hands of the W.O.R.L.D. for publication in the official records of the same.

Know further that His Imperial Majesty will be pleased to accept in His court a representative from His cousin, Good King ~~Wentworth~~ George for the purpose of

talking about foreign things and carousing and all good things like that. Make sure he can hold his pulque.

For His Imperial Majesty
Moctezuma III

/s/ Hairy-Beast Cute-Toad
Temporary Acting Assistant Deputy
Foreign Minister

RUMANIA -- Rumania ratifies the Constitution of Balkania, and relinquishes its sovereignty to the federal government of Balkania, together with all material assets (except gold factors which have not been so assigned, and the Bank of Rumania) as they exist in the possession of the Rumanian government upon the conclusion of Winter, 1901.

The Organization of Balkan States now exists with the following members: Balkania, Greece, and Montenegro. However, it will lapse if at any time it has less than three members, due to Greece's failure to renew, or the merging of existing states into Balkania.

The Bank of Rumania will buy and sell gold factors at the rate of exchange. The unit of Rumanian currency is the leu, at 1,000 lei to the Gold Factor. The leu is divided into 100 bani. The Bank will also accept deposits of foreign currencies for conversion to lei, but reserves the right to refuse a currency it considers unsound.

RUSSIA -- Russia invites any and all revolutionaries to establish themselves in those provinces of Turkey not yet occupied by Russia. Any province where a revolution begins will be avoided by Russian troops, who will endeavor to protect the revolutionists. In particular, if a revolution began in Tripoli we would certainly welcome it enthusiastically. Apply to your local Bolshevik Party for ruble credits.

SERVIA -- GREETINGS FROM THE NEW GOVERNMENT OF SERVIA TO THE NATIONS OF EUROPE!

Wresting the government away from the hands of weaklings, the heroic people of the Servian Free State have returned their nation's rightful ruler to His throne. His Most Extraordinary Majesty Patroclus Raderus Wilsonus-Moronivitch XXXIII, Heir to the Royal House of Flush, Protector of The Faith and Proclaimed Friend of The Holy See, President of Society Thirty-Three and FFFEE, has assumed full responsibility for His country and folk. His Majesty takes this opportunity to express His undying devotion to His people and to the cause of European and Balkan peace and prosperity.

It is in the spirit of His Majesty's cause that this appeal is made. The armies of the Russian Czar are at this very moment ravishing one of the most peace-loving nations of the world. Not a single man was or is under arms in Turkey, and yet for no honorable or imaginable reason the Russian hordes have swept out of the Caucasus Mountains with only one possible goal -- total domination of the Levant and perhaps even parts of Southern Europe. There is absolutely no excuse for this act of wanton aggression and unmitigated imperialism. The sufferings of the Armenian people in this, their time of blackest despair, will only be equalled or surpassed by the fate awaiting the other victims in the path of the thick-witted Russian colossus.

Prime Ministers, Kings, and Emperors of Europe! Unite to defeat the new Genghis Khan, smash him before all that is peaceable and honorable in Europe is chained and whipped through the streets of Petrograd as a diversion for the baying Russian masses! And yet even though no nation ever deserved to be smashed and decimated more than that of the Czar's, full-scale war in Europe would be a disaster, if only because no nation is as yet capable of dealing with the despoiler with victory assured. It is also evident that for less practical reasons war is naturally abhorrent, especially if peaceful means of settlement remain.

European heads of state, unite with Servia to oppose the Russian jackels! Join in a total trade boycott of Russia. Decree sanctions making it an act of immoral avarice or even aggression for any nation to aid in any way the Russian war effort.

Members of the W.O.R.L.D., unite to pass such sanctions where they might be enforced! Let us work together to make that august body powerful and influential in the affairs of Europe and to help secure the blessings of peace for peoples long in anguish and turmoil. Let these and other necessary sanctions be passed to remain in effect until such time as the Russian Government will come to terms and surrender her ravaged conquests.

Peoples of Europe, unite that all might live in peace and prosperity and that the wicked oppressors of Political, National, and Human Liberty might be smashed and banished from a world weary of wanton waste and war!

So be it. Decreed this Winter of 1901 at Belgrade.

For His Majesty Wilsonus-Moronivitch XXXIII,
Slubgob, Prime Minister

TURKEY --

The Sultan of Turkey hereby declares WAR on the Tsar of Russia. You are a dirty, sneaking, cowardly dog for attacking a defenseless peace-loving nation without provocation. I will live to see your complete ruin, infidel!

The Sultan of Turkey calls the attention of all nations to the invasion of our country by the Russians. If you stand by and let Russia conquer all of Turkey, none of you will be safe! Please help me fight the infidel and heretic slavie barbarians. I request an alliance with anybody who will help me destroy Russia. You can have all the spoils. I wouldn't mind being attacked so much if I had a chance to defend myself or had given Russia some cause (besides being weak and available). But I have given the cowardly Romanovs no reason to attack me. Their knife is deep in my unprotected back and I will do anything to gain revenge. I mean it, anything. I will not rest until Kiev is burned, Moscow is looted, Smolensk is ravaged, and St. Petersburg is razed to the ground and salt sown on its smoking ruins. Death and doom to all shambling, sub-human Slavs.

The Government of Turkey requests immediate consideration by W.O.R.L.D. of economic and military sanctions against Russia for unprovoked aggression against the territory of His Majesty the Sultan. Specifically, we propose:

- That all nations refuse to trade with Russia.
- That Russian deposits in all banks be impounded under the authority of the W.O.R.L.D. and held by that organization until all Russian forces are withdrawn from Turkish territory and Turkish sovereignty restored.
- That the Security Council of the W.O.R.L.D. authorize an international military intervention on Russian soil for the purpose of compelling the Romanov warmongers to cease their imperialist aggression against Turkey.

A PUBLIC DECLARATION BY HIS MAJESTY THE SULTAN:

People of the World: Do you imagine you are safe from Russia? What will Russia be like when he controls the territory and production of two Great Powers? He will certainly not stop there. Protect yourselves now! Help Turkey! Proclaim economic and military sanctions against the warmonger. If you fail to act now, you may be next to feel the hobnail boots of the nasty and brutish Slavie aggressors.

UNITED KINGDOM -- The nation of Albion is created from southern portion of the United Republic provinces of Wales and Kent. Draw a line from the easternmost portion of the inlet under the name "Wales" on the map, straight across to the westernmost part of the inlet under the name "Kent", to achieve the boundary. Albion is bounded by the Irish Sea, Wales, Kent, English Channel, and North Sea. Wales is bounded by the Irish Sea, Albion, Kent, Yorkshire, and Lancashire. Kent is bounded by Wales, Yorkshire, North Sea, and Albion; (Albion produces no industrial or agricultural yields) and the United Republic maintains its right to fish in the English Channel.
