Did you know that only two people on the planet earth completely understand the world Monetary crisis (situation as high government officials refer to it) and that they disagree?

ALTERNATE REALTY is late as you may have noticed. It will be out next week barring a printer's strike or something equally disastrous. We have a lot of material for it this time and a backlog we will use in the next issue. We are however short of articles by people outside the local group of --- whatever they are. So send those contributions in. We give a five issue sub to every contribution accepted.

A call for volunteer replacements seems necessary right now as we have been plagued with whole platoons of ENR's. Part of this problem has been our fault but to correct the mess we need to receive the orders, so please send them in or notify us of your resignation. In the meantime anyone who desires to be on our replacement list need only send a card saying so to Mike Ritter. Please specify if you are willing to substitute for OWNI, also. Thank you.

COMIX--Swamp Thing came out, more cliched than usual. The story was really very bad. Art was pretty good though. The Specter was the best to come out in the last few months only rivaled by Detective which was marred by a very bad Elongated Man story. Another good comic was The Spirit, but that is and always will be good.

Some good SF to come out is the re-issuing of Ray Bradbury's collection of short stories. "The Golden Apples of the Sun" and two others came out, and they are good. Ray doesn't have a reputation for being a good short story writer for nothing.

Mark Twain--A classic is something that everybody wants to have read and nobody wants to read.
