lists.

This game has a nice geographic balance and should prove quite interesting. The players are reminded that I like to emphasise press and are requested to write some. I got the letters from Capt Brooks and Mr Blank on the same day and the above assignments are my remembrance of what I told each. If I said it the other way in my letters I apologize, but in all fairness of the other players will have to stick with the above.

CHANGE OF ADDRESS: Hal D. Norman
5214 Charles Street Apt C
Oxnard CA 93030

ANKARA: Do not fear, my friend.

AGRESSOR HOMELAND: The above would be more meaningful if the Turkish
government had any friends. All others beware.

Augsburg Oct 1901: The German government meeting in this ancient southern
capital reports that certain foreign powers have conceded that the
question of Austrian unhappiness in Roman church affairs stems not
from questions of the universal church butb rather from a desire by
the Austrian government to attach its northern and western border
areas with buffer areas that wpuld be taken at the expense of
Germany and Italy; and further that Austria plans to push the
religious questions to the extent of excluding Turkey and Russia,
from the Balkan area. Germany is extremely interested in the result
that Austrian aggression will have on Germanic peoples in this area
if Austria tries to promote such a phoney issue and demands a public
statement by Vienna that Austria has no intention of trying to
control Rome and attempt to lock out the Eastern powers of their
rightful sphere of influence in the Balkans. Also Germany would like
a private note from Austria, or public if it suits Vienna, that no
plans are in effect against the German homeland.

AGRESSOR HOMELAND: The Analysis and Linguistics Section, Foreign Affairs Bureau of the Ministry of Agitation released its study of the German missive. "The German document was obviously composed by a Junior Clerk during Fasching. The threat of "spheres of influence" can not be ignored as it is clear that only Agressor Homeland may claim any sphere in Europe. Of course we don't care who fronts for us and it may as well be the Emperor as the Archbishop. In any case we advise a wait and see attitude.

ROME: Italy has warned you. Now we declare War against Austria.

Paris: Oct 20, 1901: President Luca was distressed to learn last week of a slandering statement made through a press release of Agressor Homeland. He said the statement was "misrepresenting" and the beginnings of a plot to undermine his new positions as President of France. He has also said that his greatest concern was the "unjustified fabrication" in the release which stated his position as commenor, and referred to his title of Duke as an "aplation." The President, Duke of Luca, said he prefers to think of that phrase as a joke, since every one knows that the Duke has a respectable background of nobility and was elected to the position of President because of his military geniys (Which he did not acquire from John Wayne, but rather from studying the wors of Napoleon Bonaparte.)

PARIS: Nov 1, 1901 The French Secret Police have begun a new cold war, intent on capturing the Agressor Control agents stationed in France. It is reported they are proceeding sucessfully, and have already closed in on several objectives.

PARIS: Nov 3, 1901: Upon the capture of seven Agressor Control agents just outside the city today, the French Secret Police began immediate interrogation. With their superior methods they quickly learned that the agents had origiated in Germany, and under the command of the Kaiser, were planning a propaganda campaign intent on the destruction of the French governmental system. To save German face however, they were opersting indirectly under the control of "Agressor H'meland" a corrupt drug dealing organiza ion running illegal underground press.

PARIS: Nov 4, 1901. President Luca Congratulated the Secret Police today on their swift apprehension of the reaming Agressor Control agents in France. Renewed interrogation revealed that "Agressor Homeland" in constructing a front for its illicit pipeweed dealings to innocent Hobbits has gone so far as to call itself a "nation" and has even erected a false flag of incomprehensible meanings. This is the first piece of factual evidence uncovered, giving any information describing the actual nature of the mysterious "Agressor Homeland".

Paris: Nov 5, 1901: The country was astounded today to discover that the late President Purtin had been assassinated, presumably by the "Agressor Control" agents recently rounded up here. It has been concluded that the assassination actually had little to do with the "nation" Agressor Homeland, but was in fact solely conspired by the Kaiser himself. Furhern re, it was revealed that axsecond plot had been established to assassinate President Luca.

Paris: Nov 10, 1901. A warning has been sent to the King of England by President Luca, informing him to beware of a possible German/Agressor Homeland plot there, attempting to corrupt the English people so that the Kaiser can gain control. Meanwhile French armies have been stationed in Belgium and Burgundy, defense against expected military aggressive moves by the Germans as a political reprisal for the failure of their conspiracy to assassinate President Luca.

AGRESSOR HOMELAND: The Ruling Council branded as "a pack of lies" the French allegation of a joint effort by Germany and the Homeland to undermine France. "It is well known that the French are too corrupt to be undermined; and if we did want to do it we would not use any one as dumb as the Kaiser as our agent, let alone us be his agent. The "Duke" is obviously attempting to divert attention from his own inadequacies."

AGRESSOR CONTROL, France: Report to Homeland Control. Complete communication has been established with all agents in France and the network is undisturbed. Our contact in the Secret Police indicates that the seven agents arrested may have tenuous ties to Germany but none are our agents. The "Paris Dragnet" resulted in 75 arrests, all known enemies of the regime or potentially embarrassing citizens. One, Pierre Cardin, had seen the "Patent of Nobility" on which Duke Luca bases his pretensions. It was issued in 1899 by one "Reverend" Kirby Hensley of Modesto, California USA who formerly did ordinations by Mail in the Universal Life Church. Our Munich branch is checking on this in reference to the mention of a universal Church in the Kaiser's blatherings. It appears the whole thing may be a screen for a Franco-German alliance." End of Intel Summary

AGRESSOR HOMELAND: To Agressor Control France: Cut off immediately all shipments of Marseilles heroin. Hard evidence indicates Duke fortune based on trade and he heavily involved. He will pay for calling us "Corrupt drug runners". All efforts are to be made to infiltrate Navy and Army, especially element responsible for internal security.

SACRAMENTO: Thanks for the Press, Dave, it saved the issue. Conrad didn't come up with his usual two pages, thank God of this could have gotten out of hand.
