Summer retreats and (conditional) Fall moves due 10/22/71.

In view of Jerry's past good record and his apology I will accept his late move, besides they affect no one else's moves. Getting married is trouble enough so we should give him a break!

Paris - Eric von Holfstadter, Deputy Minister for International Relations for the Imperial German Republic, announced with pleasure, the signing of a mutual aid and defense treaty between the nations of France and Germany. This treaty culminates many months of secret negotiations and conferences between representatives of the Third Republic and the German Empire. Any nations considering aggressive actions against either nation are hereby served notice that an attack on one will be considered an attack on both.

Oslo, Norway - Leaders of the resistance movement were rounded up by the troops of the English Provisional Government. "This counter-productive action must cease", said Major Carlton Heath-Jones, provisional Governor of Norway, in a speech to the Norway Industrialists League yesterday.

Fall 1904 Orders due 10/22/71

Paris: News has been released of a disastrous French defeat. German forces broke through in the vicinity of Sedan and captured Paris in a lightening advance. New weapons employed by the Germans have stunned the French General Staff. The weapons are described as a type of horseless carriage powered by steam, and called a Waffens-Volkswagen. The French government has escaped to southern France and claims it will fight on.

Public apology from one Gerald White, for dereliction beyond all responsibility. Due to my moving from one job to another and getting married I lost all track of moves for games. Then I honeymooned in San Diego at the time of DIPCON IV; WHAT A MISTAKE! I HAD TO CHOOSE BETWEEN MY NEW WIFE AND DIPLOMACY. Guess which lost? I again offer my humble apology and hope this will not happen in the future. I am very sorry. Jerry White

Anecdotes such as George Washington's system of making compost, quoted verbatim from his diary; the early use of fire and others all help to lighten the burden of the scientific approach and dispense their teaching smoothly. Where is the student who would not be fascinated to find out that the poetic rose petal, soft and fragrant, is capable of dissolving iron?
