of Abomination and armed with the Ring, Necronomicon, and Heart of Ahriman." His remarks were principally directed at non-union unskilled workers charged with the printing of foreign war news in overseas

Journals, not at imperial craftsmen in the employ of the government at Rome.

Following the denunciation, Emperor Goliath I announced a condition of interested attention throughout the empire after an unprovoked attack by barbarian nomads from the Sevastopol region of the imperial province of Armenia. The ~~xxxxxx~~ assault, repulsed by a vigilante committee of Turkish Campfollower Girls hastily organized by a veteran of the Magog Occupation, has not yet been linked to the Russian Government, in spite of Moscow's recent declaration of war.

"It remains the policy of the Empire" the most high reiterated, "to firmly reject such shocking overtures to international discord as the Tsar has so ungraciously thrust towards us. The Turkish people will not be tricked into conflict by such base affronts as declarations of this nature. We continue to hold our unwavering policy of peace, unflinchingly refusing to even consider debasement of international relations to such iniquitous levels of violence as suggested by the ~~xxxxxx~~ pronouncement. Should these proclamations from Moscow prove to become sadly but necessarily our duty by the Roman and ~~xxxxxx~~ Caesars, our predecessors whose powers and duties we must ~~xxxxxx~~ exercise in the best interests of humanity."

In protest against the Slavic declaration, ~~xxxxxx~~ student rioters from a Rome campus of Miskatonic University publicly incinerated their visas issued by the Russian Empire and announced the cancellation of a proposed field trip to study modern methods of medieval despotism in ~~xxxxxx~~ Tsarist cities. The president of the Academic Senate ~~xxxxxx~~ deplored the fact that the visas had been inside the ~~xxxxxx~~ consulate at the time and offered condolences to the widows of ~~xxxxxx~~ disciplinary action has been contemplated, and the Dean's ~~xxxxxx~~ that possible suspension of parking privileges for ~~xxxxxx~~ permanently ~~xxxxxx~~ to be under consideration in the conceivable future...

Sevastopol (lypsell) Stainless Stalin today took extreme exception to Emperor Goliath's declaration that Russia was a Medieval state under the rule of a Tsar. "Such medieval ideas are typical of what happens under conditions of liberal education and socialism," SS raved... Baron Munchhausen expressed sympathy for the families of the widows of Turkish war veterans upset by the invasion of Roman students recently in the ~~xxxxxx~~ consulate of Sevastopol. "We all know the generosity of Sevastopol in hiring these poor unfortunates to do light clerical work, to help eke out an existence," the baron stated.

St. Petersburg, ~~xxxxxx~~ of a terrible ~~xxxxxx~~ Vladmir ~~xxxxxx~~ Mumbo-Jumbo ~~xxxxxx~~ "This ~~xxxxxx~~ rest of the squadron. This man in a flying metal car might have saved us, but we couldn't prove we were Aryan."

A Florida official asks, "What is this nonsense about a Gypsy named V.I. Cortizor?"

St. Petersburg, ~~xxxxxx~~ Vladmir ~~xxxxxx~~ Algonquin ~~xxxxxx~~ This ~~xxxxxx~~ today crushed by Imperial Spanish troops-in-exile, led by El Cid Compadroovitch. The Emperor's Lucretia escaped the round-up with Algonquin Chief Irving R. Kagerbeaver.

SuperDiplomacy, again...

Cutting: After the direct movement stage, the first round of cutting occurs. Only the convoy and support orders may be cut, and then, only in the event that a force containing units ordered only either to support or to convoy is attacked by an enemy force. In the event of such an attack, all units change their orders to Stand, or to Hold, if they are in a specified homeland province, and do battle to the invaders. During a series of battle rounds, units retreating from one battle may cut the support offered by units in a second province to a third. Also, in the case that units standing or holding are mixed with units supporting, and all of the former are destroyed, the support offered by the latter group is cut, and remains cut until the invaders may be routed. If all attacking units which cut support are forced to retreat, support may be given for any subsequent rounds of battle.

Convoying The convoy order is executed when a fleet 'transfers' an army from the fleet's origin to the target sector of the convoy, which must adjoin the origin. A series of interlocking Convoy orders may be used to transfer armies across several sea or coastal sectors. An army begins the convoy operation by Moving or attacking to the first sector of the chain and specifying the number of 'convoys' it expects. If the chain has not been cut, and if orders have been properly written, the army is deposited in the final coastal sector and acts, for purposes of combat and retreating, as if it had attacked the target sector from the sector containing the last link in the convoy chain

Miskatonic University would run a 4- or 5- position game of Super-Diplomacy if suitable numbers of players could be obtained. We know that Charlie Turner will play, for services rendered, he may play gratis in any MISKATONIC UNIVERSITY game. We would be willing to run games of SuperDiplomacy either on the regular Dippy map, as Dan Alderson does, on the Morglay map, or on the Omnibus map.

MISKATONIC UNIVERSITY is published at the sign of the four by Anders Swenson, 145 Ponderosa Lane, Walnut Creek, Calif, 94598.

Gamesmaster is Lord LaughingGas, Irritant is Infant Prince James IV, Threat is Torquemada State Prison, fumes by the Royal Schimwelpennick!

The Mad Satirical Month
breaking into a new routine...

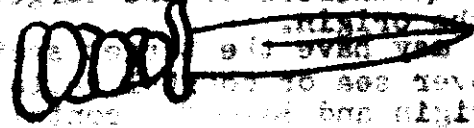

press section-

VIENNA - (from the Tagblatt): In a move that surprised no one in the Austrian capital, Emperor Francis declared war upon the Ottoman Empire. The declaration was expected though its grounds were somewhat not so. Cited as due cause for this formalization of the conflict was the fact that the Ottomans obviously had imperialistic ambitions towards Albania, a pebble one might think Austrians would let the Moslems have, and welcome. Nevertheless, a citizen's army had been raised in the city of Vienna to solidify the national sentiment. The cause for this reasoning has been found in the Emperor's daily morning game of dominoes with the Turkish ambassador. The stakes have been getting higher and higher, and the Austrian is a poor loser.

London (Reuters) His Majesty's government received today the surrender of hostile forces in both the kingdom of the Netherlands and the Danish province of Norway. Norway has been made a province of the Empire (Netherlands). The Netherlands have been made into a vassal state within the Empire (like Hungary - I'm a little confused), with his Majesty as head of state, therefore forming a personal union between The United Kingdom and The Netherlands (John's Dual Monarchy in reverse). The war with the odious Danes continues.

Sevastopol (Anarch!!) The Supreme Anarch was seen today carrying a bright banner. Asked, "What for a pacifist?", he replied "Of course I'm a pacifist, won't you be?" When consequently asked "Why, then, are you playing a warlike game?" he replied "I'm sublimating like Hell!!!"

At this point, the Anarch's interrogator revealed himself as...

personal diplomacy - mk1...

Vladimir Ivanovitch Hoove-nick, chief of the Imperial Bureau of Investigation. As he arrested the Supreme Anarch, the Anarch went limp, and flowed through a crack in the floor...

SuperDiplomacy-

For more than a year, we... attempting to write a simplified version of the SuperDiplomacy rules. This project is nearly complete, now, and... UNIVERSITY's... beginning...

Movement-during the Spring and Fall turns, units may be transferred from origin to target sector by ordering an Attack or a Move. In either case, the unit so ordered transfers to the target if the target sector is adjacent to the origin.

Fleets and Dirigibles, additionally, may have the target sector at some distance, if there is a path (over sea or coastal sectors only, in the case of a fleet) between origin and target containing no provinces with foreign units not supporting units of the Power owning the fleet or Dirigible Airfleet.

After executing the Attack or Move, the units change their orders to Hold if their orders were to Attack, or to Stand, if ordered to Move. If a Fleet or Airfleet is unable to complete its transferral, due to the lack of a needed support, the unit Stands or Holds in place. Of Course, it is possible to simply order a unit to Stand

or Hold in place.

Editorial-When M.U. was initiated, last August, there were many statements current to the effect that there were too many Dippy journals. Well, there is a problem, in that many of the small 'zines, such as the one you are reading, cannot reach all of the players of the Postal game extant.

We see the need, possibly, for some sort of confederation of players and publishers-to the same end as the late unlamented IDF, although not by the same means. We understand that Don Miller will shortly distribute a flyer on the N3F games bureau, which seems to be entering the Dippy Arena (Good-Dip's can play politics anytime, so they aren't as likely to play with the organization as other fen-it sez beer...). Perhaps we will see this N3F scene as one suitable for M.U. to make... hope so!
